

**THANK YOU FOR
FAITHFULNESS IN
TITHING & GIVING**

“Bring the full tithe into the storehouse, that there may be food in my house. And thereby put me to the test, says the Lord of hosts, if I will not open the windows of heaven for you and pour down for you a blessing until there is no more need.” Malachi 3:10 ESV

Tithing and offering is scriptural and is used to support the organizations of the Church. Place your tithes and offerings in an envelope and designate it as such so it will be handled in the proper manner.

Our first Sunday (of the month) offering goes to the Pastor, second Sunday to Missions, third and fourth Sunday for church expenses. We collect an orphanage offering the last Sunday of the month and every fifth Sunday offering goes to our church treasurer!

What's the Smallest Thing You Can See?

He that planted the ear, shall he not hear? He that formed the eye, shall he not see? – Psalm 94:9

Evolutionists never get tired of mocking the supposedly poor design of the human eye. They are attempting to poke a finger into the eye of the Christian's Creator God when they say, "If God is such a good designer, why did he do such a sloppy job with the eye?" On previous broadcasts, we have provided many reasons why the human eye is one of God's most magnificent creations. Today we'll take a look at new research showing that the human eye can detect the tiniest speck of light there is – a single photon.

Previous experiments have shown that humans can see blips of light made up of just a few photons. But according to new research published in Nature Communications, the subjects were able to detect a single photon – something the researchers never expected. Physicist Alipasha Vaziri of Rockefeller University in New York City says, "If you are somewhere outside of a city in nature and on a moonless night and you have only stars to navigate, on average the number of photons that get into your eye is approaching the single photon regime." This is why he feels that having eyes sensitive enough to see single photons "may have some evolutionary advantage." It's not surprising that evolution gets all the credit. However, whether they think the eye was poorly or beautifully designed, evolutionists must recognize that the eye was designed ... and this implies a Designer!

"Every time we think of you, we thank God for you. Day and night you're in our prayers as we call to mind your work of faith, your labor of love, and your patience of hope in following our Master, Jesus Christ, before God our Father. It is clear to us, friends, that God not only loves you very much but also has put his hand on you for something special". 1 Thessalonians 1:2-4 The Message (MSG)
